## ABOUT ME

Computer Science student at the University of Colorado Boulder with experience in Python, C++, and data structures. I enjoy building practical software tools that solve real problems, including a Trie-based search engine and a job-skill matching platform developed in a team environment. I am particularly interested in front-end development and UI/UX design where technical implementation meets user experience.

## PROJECTS

- **Smart Makeup Search Engine (Trie Data Structure)**
- **School Software Project**
  - Designed and implemented a search engine using a Trie data structure to efficiently match makeup products by name and category.
  - Implemented product lookup and filtering to improve search speed and user experience.
  - Built the project in Python with structured data handling.
- **Talent Trail – Skill to Job Matching Platform**
- **Group Software Engineering Project**
  - Developed the front end interface that allows users to select job roles and complete skill questionnaires.
  - Contributed to UI design and feature implementation using React and Python.
  - Worked in an Agile team environment using GitHub for version control and sprint collaboration.

## SKILLS

- Languages: Python, C++, Scala
- Web Technologies: HTML, CSS, Flask
- Tools: Git, GitHub, Jupyter Notebook, Linux
- Concepts: Data Structures (Trie, Trees, Hash Maps), Object-Oriented Programming, Agile Development, REST APIs

## EDUCATION

University of Colorado Boulder

**Bachelor of Science in Computer Science**

*Expected Graduation August 2026*

GPA: 3.2

**Bachelor of Arts in Ethnic Studies**

**Minors: Arabic, Multicultural Leadership (Education)**

Graduated August 2022

**Relevant Coursework:**

*Data Structures, Software Development, Algorithms, Discrete Mathematics, Cybersecurity, Functional Programming*

## EXPERIENCE

**Middle School Math Teacher**

Omar D Blair Charter School – Denver, CO

*March 2023 – Present*

- Teach Grade 7 mathematics including algebraic reasoning, proportional relationships, and rational number operations.
- Analyze student performance data to identify learning gaps and adjust instruction.
- Track academic progress for over 70 students across multiple assessment cycles.
- Communicate complex concepts clearly and collaborate with interdisciplinary teams.

**Internship – Dangers of the Mind**

Washington DC

*June 2022 – October 2022*

- Assisted in organizing youth leadership workshops and educational programming.
- Supported community outreach initiatives focused on student development.

## ADDITIONAL INFORMATION

- Fluent in Arabic and English
- Strong interest in UI/UX design and front end development
- Experience collaborating in Git-based team software projects
