TECHNICAL SKILLS

Languages

Python, JavaScript, C++

Frontend

React, HTML, CSS, JavaScript

Backend

Flask, SQL, REST, APIs

Tools

Git, GitHub, VS Code, Linux,

Figma

Concepts

Data Structures & Algorithms,

Object-Oriented Programming,

Agile Development, UI/UX

Principles, Problem Solving

PROFESSIONAL SUMMARY

Computer Science student at the University of Colorado Boulder with experience building web applications using React, Python, Flask, JavaScript, HTML, and CSS. Developed projects including a skill-to-job matching platform, a Trie-based search engine, and image-processing applications. Strong background in communication, problem-solving, and data analysis from professional experience in education. Seeking front-end or software engineering opportunities.

EDUCATION

Bachelor of Science in Computer Science

Graduation August 2026

College of Engineering | University of Colorado Boulder

Bachelor of Arts in Ethnic Studies

Aug 2018 - Aug 2022

College of Arts & Sciences | University of Colorado Boulder

Data Science Certification

Aug 2026

University of Colorado Boulder

PROJECTS

Talent Trail | React, Python, Flask, GitHub

- Developed responsive interfaces for a career exploration and skill assessment platform.
- Designed user-facing pages including career selection, questionnaires, and results screens.
- Collaborated in an Agile team environment using GitHub for version control and feature development.

Beauty Search (Trie-Based Search Engine) | Python, Data Structures

- Designed a Trie-based search engine enabling efficient prefix-based lookup of makeup products.
- Implemented category filtering and search suggestions using custom data structures.
- Reduced search complexity compared to linear search approaches.

RSA Encryption Project | C++, Cryptography

- Implemented RSA encryption and decryption using modular arithmetic.
- Developed key generation, message encryption, and decryption workflows.
- Built a command-line application demonstrating secure message encryption and decryption.

Image Filter Application | Python, OpenCV

- Created an image-processing application capable of applying multiple visual filters.
- Implemented grayscale, blur, sharpen, and edge-detection effects.
- Developed a simple interface for real-time image manipulation.

WORK EXPERIENCE

Middle School Math Teacher

Mar 2023 - Jun 2026

Omar D. Blair Charter School | Denver, CO

- Analyzed student performance data to identify learning gaps and support academic growth.
- Managed progress tracking and assessment data for more than 70 students.
- Communicated complex concepts clearly to diverse audiences and collaborated with interdisciplinary teams.

Leadership Intern

Jun 2022 - Oct 2022

Dangers of the Mind | Washington, DC

- Assisted with leadership workshops and educational programming initiatives.
- Supported community outreach efforts focused on student development.
